

(glial-opioid receptor interface in analgesia)

GLORIA symposium

2 December, 2016, IGBMC, 1 rue Laurent Fries, 67404 Illkirch, France

Neuroinflammatory mechanisms in pain and analgesia

9:00 – 9h25 Registration

9:30 Opening words

Theme 1: Good and bad glia

9:45 Key note presentation: The good and bad glia in neuroinflammation and pain

Michael Salter, University of Toronto

10:45 Break for Coffee

Theme 2: Human and animal models: pain and neuroinflammation

11:15 Fibromyalgia and osteoarthritis in patients

Eva Kosek, Karolinska Institute

11:45 Osteoarthritis in mice

Camilla Svensson, Karolinska Institute

12:15 Fibromyalgia in mice

Hiroshi Ueda, Nagasaki University

12:45 Discussion

13:00 Lunch

Theme 3: Human and animal models: neuropathy, mood, and neuroinflammation

14:00 Neuropathic pain: lost in translation?

Andrew Rice, Imperial College London

14:45 Anxiety: of mice and man

Iiris Hovatta, University of Helsinki

15:30 Break for Coffee

Theme 4: New pharmacological approaches targeting neuroinflammation

16:00 Anti-depressants – peripheral beta-2-adrenergic effects and antiTNF

Michel Barrot, University of Strasbourg

16:30 TRPA1 in pain and neuroinflammation

Ari-Pekka Koivisto, Orion Pharma

17:00 Discussion

17:30 End of the symposium

GLORIA is funded by the Framework Programme Seven of the European Union
